

H6

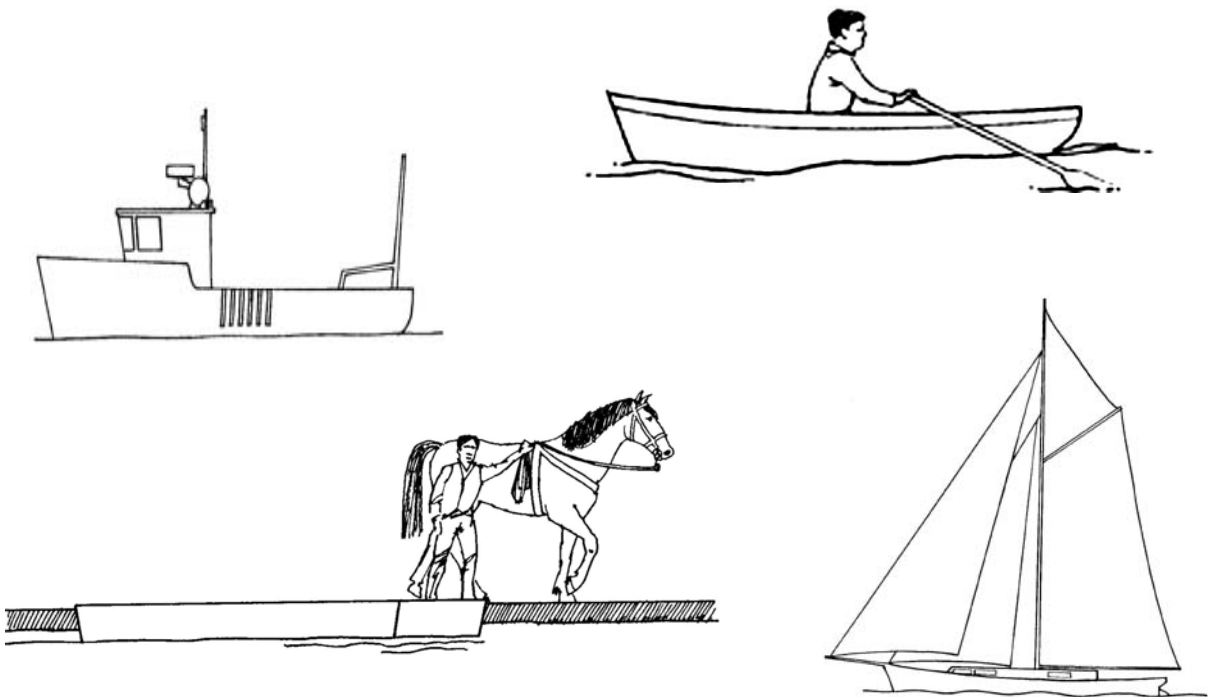

Water transport

Workmen dug out the leats and lined them with bricks to make canals for the transporting gunpowder and its ingredients. This is the shape of the leat (canal) if you cut a slice through it

Which would be the best type of boat to use on the leats to move the gunpowder?

Label the boats and draw a circle round your choice

Sailing boat	Motor Boat	Rowing boat	Horse drawn punt
--------------	------------	-------------	------------------
