

W2 Surviving at Oare - a bird's diet

Young birds often eat many different foods. Some are shown below. Put a tick next to any that you see and then add up your score to see if a young bird could survive.

small spiders

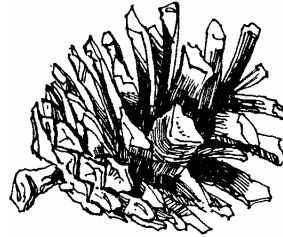

hazelnuts

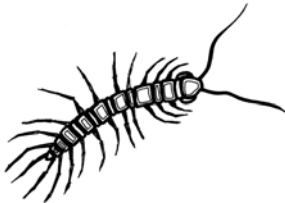

snails

pine cones

centipedes

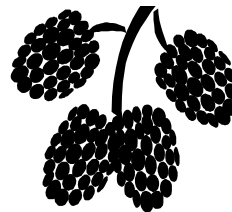

small seeds

ground beetles

berries (e.g. blackberry)

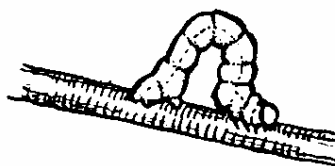

flying insects

fruit tree buds (e.g. cherry)

caterpillars

Check your score

- 0-4 = Oh dear, they would have died
- 5-8 = They will probably survive
- 9-11 = Great! They will survive
